

# Technical Conference on Environmental Permitting & Construction

February 2 - 4, 2016

Hyatt Regency - Savannah, GA

## About the Technical Conference on Environmental Permitting & Construction

The SGA Technical Conference on Environmental Permitting & Construction is designed to provide professionals in the pipeline design and construction industry a better understanding of the requirements associated with permitting complex projects and ensuring they are constructed per the federal, state, and local regulatory requirements. This conference is an opportunity for environmental professionals of pipeline operators and service providers to learn more about activities related to meeting the National Environmental Policy Act (NEPA) requirements for pipeline construction.

{tab=Environmental Excellence Awards}

The SGA [Environmental Committee](#) is seeking nominations for the **2016 SGA Environmental Excellence Awards**. This award will recognize companies who have made significant impacts in protecting our environment. Through utilization of innovative environmental practices, SGA member companies reduce waste, save money, and contribute to the industry's environmental protection efforts, as well as benefit the health and welfare of the nation. Program must be voluntary and not the result of mandates by regulations or enforcement decrees. Work on this program must have been completed in 2015 for the 2016 Environmental Excellence Award nomination Companies must agree to share the project or program information with others during the [Environmental, Safety & Health, and Training Conference](#) in June.

### **Tour of Elba Island LNG Export Terminal and Elba Island Salt Marsh Restoration Project Tuesday, February 2nd, 2016**

**8:00 am to 11:00 am**

Join us for a tour of the Elba Island LNG terminal located approximately 10 minute drive from the conference facility. Southern LNG (SLNG), a business unit of Kinder Morgan, Inc., owns the Elba Island LNG terminal. The terminal has 11.5 billion cubic feet (Bcf) of LNG storage capacity and 1,755 million cubic feet per day (MMcf/d) of peak vaporization send-out capacity. The Elba Island LNG terminal is directly connected to four major pipelines and indirectly to two others. Transportation to the facility and for use during the driving portion of site tour will be provided. We will tour the LNG Terminal Facility and hear a presentation about its operation.

Weather permitting, we will also visit Kinder Morgan's nearby successful salt marsh mitigation site. The *Elba Island Salt Marsh Restoration Project* was selected as one of Georgia's five State Award Winners for the 2016 Engineering Excellence Awards and is being entered in the American Council of Engineering Companies (ACEC) National Engineering Excellence Awards competition. Thank you to [Kinder Morgan/SLNG](#) for providing this opportunity and to [HDR, Inc.](#) for the support in coordinating and sponsoring the bus service for the event.

### **Extend Your Networking Virtually**

Members have the capability to extend their networking beyond the actual event. This private social network allows members to connect with one another and ask questions, post in the online library, and further connect with peers. Join in the virtual conversations today at [Connect@SGA](#).

### **Professional Development Hours**

In addition to improving job performance, attending this workshop qualifies for 12 Professional Development Hours (PDHs). For more information: [SGA PDH Information](#).
